

High Achiever, Gifted Learner, Creative Thinker

Bertie Kingore, Ph.D.

Identification of gifted students is sometimes clouded when concerned adults misinterpret high achievement as giftedness. High-achieving students are noticed for their on-time, neat, well-developed, and correct learning products. Adults comment on these students' consistent high grades and note how well they acclimate to class procedures and discussions. Some adults assume these students are gifted because their school-appropriate behaviors and products surface above the typical responses of grade-level students.

Attached is a list that provides a three-way comparison of a high achiever, a gifted learner, and a creative thinker. The columns are not intended to be mutually exclusive. Students may exhibit behaviors from one, two or all three columns. In addition, gifted children might also exhibit some less desirable behaviors such as dislike for routine and drill, a critical attitude toward others and/or self, occasional resistance to direction, stubbornness, frustration with inactivity (boredom), and a tendency to dominate others. There is a considerable amount of individual difference found within this population, and profiles are likely to vary a great deal.
